

cyberCide[®] Activation Module

Definitions:

Machine 1 – this is a computer with a working operating system and internet connection that will not be sanitized
Machine 2 (the TARGET) – this is the computer you desire to sanitize with cyberCide

Machine 1:

Download and install the cyberCide Activation Module from <http://www.cyberscrub.com/cybercide/cybcidact.exe>.
(Remember: this machine must have an internet connection and must not be the machine you want to sanitize)

Machine 2 (the Target): Machine to be Sanitized

- 1) Insert the cyberCide CD.
- 2) Restart the machine.
- 3) On restart, as the first screen appears, you may be prompted to click any key to boot from the CD...
If so, please press any key to boot from this CD.
- 4) The cyberCide program will start booting from the CD. Now follow the screen prompts.
- 5) You will be provided the “Protection Key” information from the target machine. Please write this down and then return to Machine 1

On Machine 1:

On Machine 1, (where you have installed cyberCide Activation Module), double click on the Desktop icon (Figure 1) to open cyberCide Activation Module.

Figure 1

- 6) The screen shown in Figure 2 will display.

Figure 2

- 7) Click on the Right Arrow button to proceed to the next screen, as shown in Figure 3. You will be prompted for your “Product Key” which will be in the email receipt you received at the time of your purchase (the email receipt may also refer to this as the “serial number”). Please enter the Product Key and click the Right Arrow button to continue.

Figure 3

- 8) You will now see the screen shown in Figure 4, which prompts you for the “Protection Key” generated by Machine 2 (the Target). Enter the Protection Key you wrote down from Machine 2 in step 5 and then click the Right Arrow button to continue.

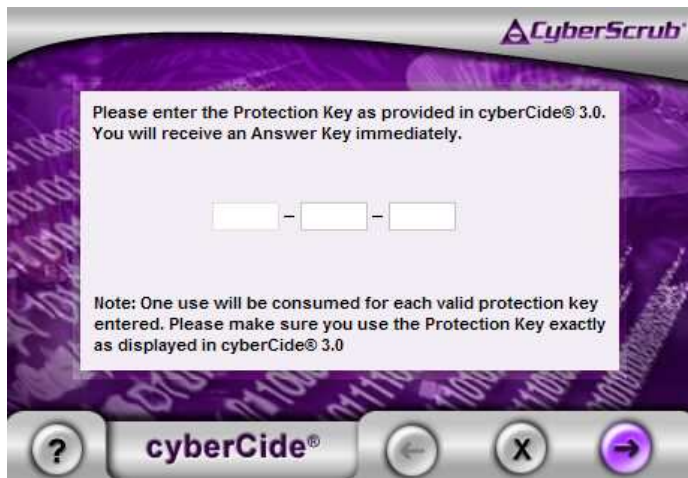

Figure 4

- 9) On the next screen, as shown in Figure 5, you are provided with the "Answer Key." Go back to Machine 2, the Target machine to be sanitized, and enter the Answer Key. Sanitization of the machine will begin.
