

NEW CyberScrub *Infinity Safe*™ Cloud compatible

The NEW CyberScrub Infinity Safe™ lets you encrypt files before storing on Dropbox®, Google Drive®, One Drive® and more!

Atlanta, GA Sept. 21, 2015: Infinity Safe™ is compatible with cloud providers such like Dropbox®, One Drive®, iCloud®, Google Drive® amongst many others. You control the password so you and ONLY YOU can access your information. You can even share files securely with multiple passwords you create and can share as you think fit! You are in complete control!

Whether you're an at-home user or corporate employee, this truly allows you to share files securely.

Users are referring to this as ***“Truly a revolutionary product!”***

CyberScrub® announces the new Infinity Safe™ for both Privacy Suite® 6.0 and CyberScrub Security® 6.0. The latest proprietary development –Infinity Safe™ – allows users to quickly and easily encrypt their personal data, store it on their hard drives OR automatically secure, sync and share it in the cloud. To meet the growing demands of our customers for privacy, CyberScrub designed the newest innovation in personal security –the Infinity Safe™. This Safe allows users to secure their data with world-class encryption technologies in one simple step. The encrypted data can be safely and securely stored wherever you want (personal hard drive, the cloud, with family/friends). Either way, you will have the ability to secure your privacy your way –keeping personal information away from prying eyes of commercial hackers. Our new releases are compatible up to Windows 10. Targeting some of the many cloud storages such as:

- Dropbox®
- iCloud®
- Google Drive®
- Box®
- Copy®
- Amazon Cloud Drive®

Combined with CyberScrub's existing secure deletion technology, users can permanently delete any unencrypted remnants of data utilizing DoD standard sanitization methods and more. Statistics show that billions of people have had some part of their identity stolen from personal computers unknowingly over the past few years. CyberScrub's NEW addition helps people just like you maintain true OWNERSHIP of their information. Users can create their individual safes and share them with colleagues/professional advisers as well as friends and family. The Infinity Safe™ provides you the peace of mind knowing that you truly have control of all data –and who has access to it as well.

“ I tested the Infinity Safe™ in the beta releasing and immediately after I found out about the ability to encrypt data while storing it in multiple safe locations really enhanced my liking of the product. I've been breached in the past and always look for ways to protect my personal information, including the loads of pictures I have. Now I'm able to secure and share my personal data how I want with new cloud compatible features. This is truly a revolutionary product!”

CyberScrub LLC headquartered in the US, is a robust solution provider enabling user privacy and data security. Our products are rated number one for most powerful secure data deletion and encryption safe. Take full control of your identity; Safe n Scrub with CyberScrub!
